

Project Design Phase
Proposed Solution Template

Date	15 February 2025
Team ID	LTVIP2025TMID34308
Project Name	Grain Palette –A Deep Learning Odyssey in Rice Type Classification Through Transfer Learning
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	We are given a rice type classification application which is used to classify different rice grains which will benefit people
2.	Idea / Solution description	We are going to use a web 3 interface of flask, mobileNet V3 and Kaggle rice dataset to train the model and build the app
3.	Novelty / Uniqueness	This application is trained with over 25 thousand images and also gives tips for different grain to grow with good yield
4.	Social Impact / Customer Satisfaction	Customers have positively rated the app, from testing phase and they are satisfied with the overall working and utility of the developed application
5.	Business Model (Revenue Model)	This is not mainly made for revenue, but we can plan an annual pricing plan to make the website run using global servers
6.	Scalability of the Solution	This application can be used by anyone with a mobile/laptop so it is largely scalable and has big scope.
