

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	31 January 2025
Team ID	LTVIP2025TMID34308
Project Name	<i>GrainPalette –A Deep Learning Odyssey In Rice Type Classification Through Transfer Learning</i>
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIn
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Image uploading	Done through flask application using mobile V4 net
FR-4	Image processing	Done with processing image and classifying based on trained model from tf file

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	It is used mostly by market persons and farmers
NFR-2	Security	It is secured with credential logins
NFR-3	Reliability	It is highly reliable as it has good accuracy
NFR-4	Performance	It performs well because it is trained with huge data set of images
NFR-5	Availability	It is deployed , so can be globally accessible

NFR-6	Scalability	It is a good scalable app, as it is easy to make and less requirements needed to run the app
